

General Use:

Use **Bio Green Clean** to clean any washable surface. For normal jobs, spray and wipe. For tough jobs, spray on, agitate the molecules and let stand for two (2) minutes, then wipe clean.

How to Do Laundry:

Use **Bio Green Clean** to replace toxic commercial laundry detergents. Follow manufacturer's washing instructions for fabric type and clothing. For the best laundry results, always use **Bio Green Clean 3:1 solution** since it more rapidly disperses in the wash cycle and the molecules have already been activated by water. Pre-treat spots and stains with **Bio Green Clean 3:1** in a spray bottle. The spraying action also helps to further activate the cleaning molecules.

SMALL or LIGHTLY SOILED:

Use 2 to 3 ounces of 3:1 solution

MEDIUM SIZE to MEDIUM SOILED LOADS:

Use 3 to 4 ounces of 3:1 solution

LARGE SIZE to HEAVILY SOILED LOADS:

Use 4 to 6 ounces of 3:1 solution

If especially greasy or soiled laundry, allow to soak at least 30 minutes or overnight if necessary. Use the pre-soak feature on your washing machine or fill as usual and allow agitating for 2 minutes. Stop the wash cycle by opening the lid or pulling up on the dial for desired amount of soaking time, then resume washing as usual by closing the lid or pushing in on the dial.
